EV Chargers

Powering the Future

The **zappi multiphase** is a **versatile, smart EV charger** designed for homes and businesses. Available in **7kW and 22kW**, it seamlessly adapts to both **single and three-phase** power supplies, delivering fast, efficient charging with maximum flexibility.

Built with sustainability in mind, the **zappi** allows you to charge your EV using **100% green energy**, giving you complete control over your power source. With a sleek design and intelligent features, it makes home charging **smarter, cleaner, and more cost-effective**.

The **MyEnergi Zappi** offers three charging modes to suit every setup. **ECO mode** prioritises self-generated **solar or wind power**, reducing reliance on the grid and lowering energy costs. **FAST mode** ensures rapid charging when you need it most—working just like a standard EV charger but with added intelligence.

- ✓ **Universally Compatible:** All electric (EVs) and plug-in hybrid vehicles.
- ✓ **Smart Charging:** ECO, ECO+ & FAST modes optimize savings and renewable use.
- ✓ **Renewable Ready:** Supports solar and wind self-consumption.
- ✓ **Remote Control:** Manage via the MyEnergi app.
- ✓ **Secure & Up-to-Date:** Timer, PIN lock, and auto updates.
- ✓ **Grid-Compatible:** Works with battery storage and tariffs.
- ✓ **Warranty:** 3 years.

The **Easee One** is a **compact, intelligent EV charger** designed for home use. Developed by Norwegian company **Easee**, it's built for **efficiency, reliability, and smart charging**. Recognised for its performance, it was awarded **UK's Best Home Charger** at the Auto Trader New Car Awards 2024, based on feedback from over **200,000 UK car owners**.

With the **Easee One**, you can charge up to **three times faster** than a standard household outlet. It automatically adjusts to the available power supply, ensuring **fast, efficient charging** whenever you need it.

- ✓ **Universally Compatible:** All electric (EVs) and plug-in hybrid vehicles.
- ✓ **Smart & Compact:** Award-winning, lightweight (1.5kg).
- ✓ **Fast Charging:** Up to 3x faster (1.4–7.4 kW).
- ✓ **Easy Install:** No earth rod needed, reducing cost & time.
- ✓ **Load Balancing:** Supports 3 units per fuse wirelessly.
- ✓ **Smart Control:** Manage via app, WiFi, or API.
- ✓ **Secure & Safe:** RFID, RCD, and cable lock option.
- ✓ **Warranty:** 3 years.

Energy Certified Installer

The **Tesla Wall Connector** is a **sleek, efficient home charging solution**, designed to keep your EV ready to go. Simply **plug in overnight** and start the day with a **full charge**, hassle-free.

Built for versatility, it adapts to **most home electrical systems** with **customisable power levels**, making it compatible with a range of grid connections and amperage. This flexibility makes it ideal for homes, apartments, and workplaces.

With its **lightweight, durable design**, the **Tesla Wall Connector** is suitable for both **indoor and outdoor installation**, providing a seamless charging experience wherever you need it.

- ✓ **Universal Compatibility:** Works with any Type 2 EV.
- ✓ **Fast Charging:** Up to 22 kW, 71 km/hour.
- ✓ **Smart Control:** Manage via the Tesla app.
- ✓ **Adaptive Power:** Adjusts to home energy use.
- ✓ **Connected:** Wi-Fi for updates.
- ✓ **Flexible Install:** Ideal for homes, workplaces & more.
- ✓ **Convenient:** 7.3m cable, port opens from connector.
- ✓ **Warranty:** 2 years.

Start Your Renewable Energy Journey with smart and efficient charging solutions

We're making it easier than ever to receive a **tailored quote** for your home's renewable energy system. With our simple online survey, you're just a few steps away from improving your home's efficiency and reducing energy costs.
